ASF PARTICIPATES IN THE AIRLIFT OF CRITICALLY NEEDED MEDICINES

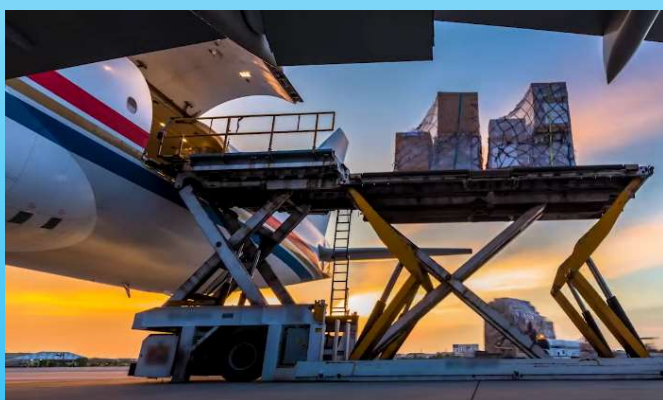

Following the call to all ASF sections “to deliver medical & emergency equipment to Beirut in a single spirit of solidarity” by Gérard FELDZER, President of Aviation Sans Frontières France, five ASF sections are participating so far to the Rapid Response Mechanism put in place by ASF-International with International Health Partners IHP and brought into action by ASF Project Management Hub “Brussels”.

IHP air freight is composed of **11 pallets of medicines worth € 114,450** and will provide 28,613 treatments. The flight is departing tonight from Heathrow to Beirut via Doha.

*Medicine for
those in need*

With IHP, ASF gets direct access to donated medicines in case of sudden onset disaster in return for covering their mobilization cost for a tenth of the value of the medicines as well as the air freight to IHP certified partners in the field. This rapid mechanism can be triggered within a few hours and set up in a few days.
